ABOUT US

Bitcraft Abstractions Pvt Ltd, founded in November 2017, is a top-tier IT services company specializing in web and mobile app development. Our skilled team merges technical expertise and creative thinking to deliver outstanding digital solutions tailored to our client's needs. We pride ourselves on our commitment to excellence and dedication to helping businesses thrive in the digital landscape.

CORE TEAM

Jinal Khothri

Founder & CEO

Jinal holds a Masters of IT degree from the Australian National University and offers a wealth of experience and skills. As the Founder & CEO, he serves as the Tech Lead in projects and excels in project management, domain analysis, and software design. Jinal is a natural communicator with exceptional command over React, Typescript, Node.js, Flutter, and more.

Hardik Makwana

Senior Engineer

Hardik, an IT Engineering graduate, is an expert in React, HTML/CSS, and Flutter. As our in-house design specialist, he crafts stunning layouts and styles for Flutter and React apps. His exceptional work ethic and attention to detail make him a valuable asset to the team.

Akshay Borad

Senior Engineer

Akshay, also an IT Engineering graduate, excels in logical reasoning and problem-solving. He is an expert in React and Flutter, handling API integrations, DevOps tasks, and other logic-based challenges with ease.

SKILLS / TECH STACK

Our core expertise at Bitcraft Abstractions lies in Typescript, Node.js, React, and Flutter, along with their respective ecosystems. We are proficient in Git for version control and have experience with databases such as PostgreSQL, MongoDB, and Firebase Firestore. Additionally, our team is well-versed in Next.js, project management, domain analysis, software design, Google Cloud Platform, GraphQL, Apollo Client, and Apollo Server. For Kubernetes and Terraform, we collaborate with external experts to guarantee top-quality results.
